Release : May 31, 2016

### **Branding Update for Visiport® - Supplier of Electric & Air Powered Spin Window Systems**

In order to better represent our brand worldwide, we are pleased to announce that T2K - TOOLING 2000 will officially become Visiport®, effective July 1 of this year.

The Visiport® product line will continue to be offered, but with new, simplified part numbers to assist both OEM and end users.

Our popular electrically powered product line, formerly known as Visiport, will be renamed our E-Series, while our air-powered DiscAir spin window line will be renamed our A-Series.

We are excited about our branding update, and look forward to introducing additional product and service improvements under the new Visiport® banner.

For more information, contact [sales@isiport.com](mailto:sales@isiport.com) or call us toll free at 1-800-267-2120.

About Visiport®: [Visiport.com](http://www.Visiport.com) is the leading manufacturer of spin window systems for machine tool applications. Based in Redmond, WA, Visiport® offers the most comprehensive product line of electric and pneumatic spin window systems available worldwide.
